About Me

Fresh graduate from a vocational school majoring in Software Engineering with an average score of 82.86/100. Possess a strong foundation in frontend and backend web development, with practical experience gained through projects during education. Demonstrate adaptability, a keen interest in new technologies, and a fast learning ability. Additionally, thrive in challenging environments and are committed to producing high-quality results.

Work Experience

Feb 2022 – Mar 2022 | Field Practice | Fullstack Developer | PT. JAYA KONSULTAN INDONESIA

- Created a website landing page display using React.js and Bootstrap, ensuring a responsive and visually appealing user interface.
- Implemented and optimized website functionalities, improving the overall user experience.
- Collaborated with the backend development team to integrate frontend components with server-side logic for seamless data flow.
- The project took about 1 Months to complete

July 2023 – July 2024 | Contracts | Fullstack Developer | PT. EDIfly Solusi Indonesia

- create an in-flight cargo terminal application
- Application message flights

- Developed a fully functional Sales Management System over a 3-month project period using React.js as the primary frontend framework. The system was built with Javascript for efficient server state management and Chakra UI for a modern, responsive, and accessible design.
- Designed and implemented a clean, scalable, and bug-free codebase following best practices to ensure maintainability and performance. Collaborated closely with the backend development team to integrate frontend components seamlessly with server-side logic, ensuring smooth data synchronization and optimal user experience.
- The result was a highly responsive, visually appealing, and user-friendly sales platform that improved workflow efficiency and enhanced overall usability.

Education

July 2020 – May 2023 | SMK MEDIA INFORMATIKA | Software Engineering

- Learn Software Development
- Learn some of programming language like PHP, Java, C++, etc.
- Implementing the language Execution Commands, Text Based Programming, Graphics, and Multimedia
- Installing, Setting, And Implementing Structured Software Programming
- Performing Software Configuration in Accordance with the Environment Development, Staging Production

Aug 2024 – Aug 2028 | Binus University (Online) | Computer Science (OnGoing)

- Introduction to programming languages such as Python, Java, and C++.
- Data structures and algorithms for solving computational problems.
- Object-Oriented Programming (OOP).
- Software engineering principles and project management.
- Agile development and version control (e.g., Git).
- Database design and implementation.
- SQL and NoSQL databases.
- Advanced topics like data warehousing and big data analytics.
- Operating system concepts like process management and memory allocation.
- Low-level programming and system calls.
- Introduction to cloud platforms like AWS, Azure, or Google Cloud.
- CI/CD pipelines and containerization (Docker, Kubernetes).

Jan 2024 – Jun 2024 | PT. Dumbways Indonesia Teknologi | Fullstack Developer

- Gained an in-depth understanding of Full Stack software development, including Frontend and Backend development.
- Actively participate in team projects involving the creation of web applications from inception to launch, gaining practical experience in team-based software development.
- Learned and applied various cutting-edge technologies and tools in web development, including HTML, CSS, JavaScript, TypeScript, React, Node.js, Express.js, Nest.js, Material-UI, Chakra-UI, Tailwind.
- Successfully managed and completed complex projects on time, showcasing strong project management and problem-solving skills.

Hard Skills

- Performing Reciprocal Work Communication
- Performing Work Requiring Teamwork
- Identifying Aspects of the code of ethics and intellectual Technologies
- Planning Routine Tasks
- Applying Quality System
- Implementing the Principles of Occupational Safety and Health in the working environment
- TOEFL And IELTS
- Nest.js, React.js, Typescript, Javascript, Java, HTML, CSS, Bootstrap, Java, PHP, C++, Python
- MySQL-Front, MS SQL, PostgreSQL, And MongoDB
- Tailwind-CSS, Chakra-UI, Material-UI, Prisma-ORM, Node.js

Soft Skills

- Fast Learning
- Leadership
- Time Management
- Critical Thinking
- Communication skills for technical and non-technical audiences
- Team Work
- Entrepreneurship

TOEFL And IELTS On University Of Indonesia

Result Of TOEFL Exams

STUDENT ASSESSMENT REPORT TOEFL PREPARATION COURSE

Name : Ravano Akbar Widodo

Attendance (out of 52 hours):

92%

	Entry	Exit
Listening Comprehension	68	68
Structure and Written Expression	61	67
Reading Comprehension	34	67
Total Score (out of 677)	543	673

Comments:

Your test results show that your scores have increased considerably. Keep reviewing and applying the test strategies learned, and you will achieve even greater. Well done!

Date: 27 December 2021

Teachers,

Zhilal El Furqaan

Siti Lutfiyannah

Result Of IELTS Exams

STUDENT ASSESSMENT REPORT IELTS PREPARATION COURSE

Name: Ravano Akbar Widodo

Attendance (out of 52 hours)

96%

	Entry Band	Exit Band
Listening	9.0	8.5
Reading	9.0	8.5
Writing	9.0	8.0
Speaking	8.5	8.5
Overall Band Score	8.5	8.5

Comments:

Your overall score has increased yet, but we see much potential in you. We suggest that you put greater effort to review the test-taking strategies and to practice applying them by doing regular practice. By doing those things, you will see your skills eventually improve. Good luck!

Teachers,

Meutiati A. Ranthy

Areyke Herlina Caroline M.

PORTOFOLIO

PROJECT 1

CIRCLE APPS

Objective

Circle App is a social media application allowing users to create and interact with threads like on Instagram or Twitter. It uses a RESTful API with an Express.js backend, React frontend, and Chakra-UI for styling.

Tech Stack

- Typescript
- ExpressJS
- ReactJS
- ChakraUI
- Prisma
- PostgreSQL

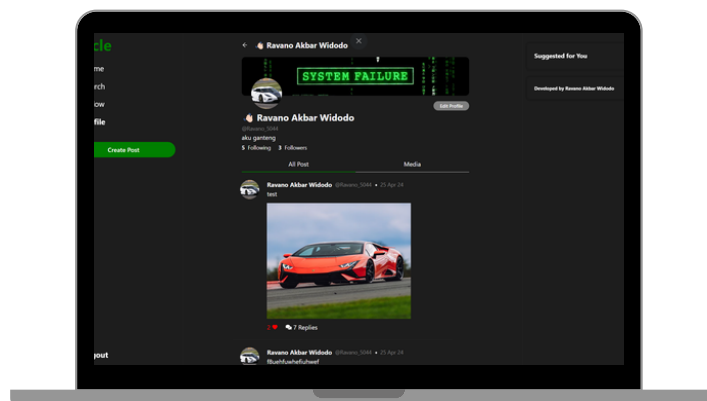

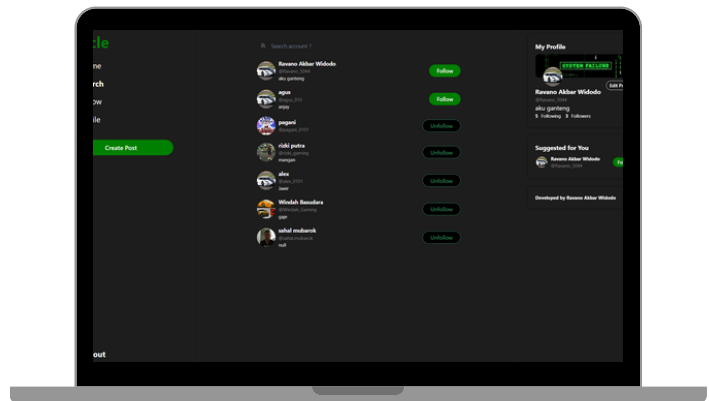

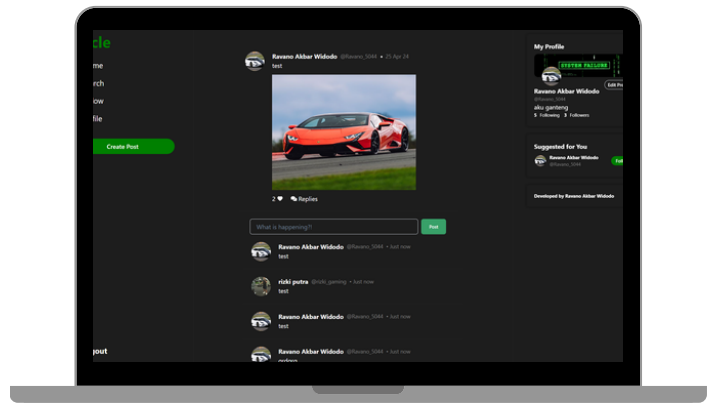

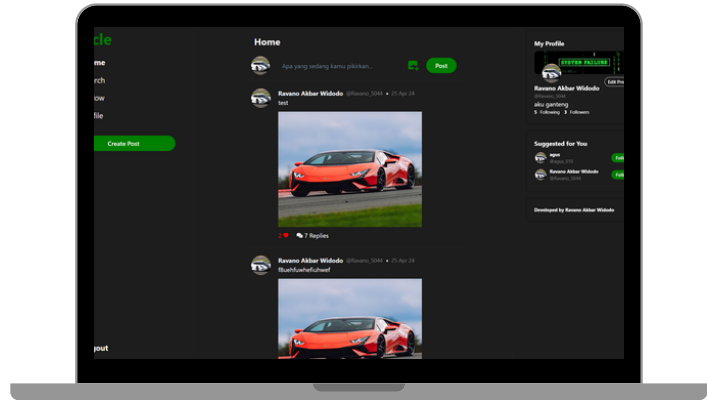

Source Code

Front End

Back End

PORTOFOLIO

PROJECT 2

LAKOE APPS

Objective

Lakoe App is an e-commerce application developed by a four person team for a DumbWays bootcamp project. This project utilizes a RESTful API with a NestJS backend, React frontend, and Material UI for styling.

Tech Stack

- Typescript
- ExpressJS
- ReactJS
- ChakraUI
- Prisma
- PostgreSQL

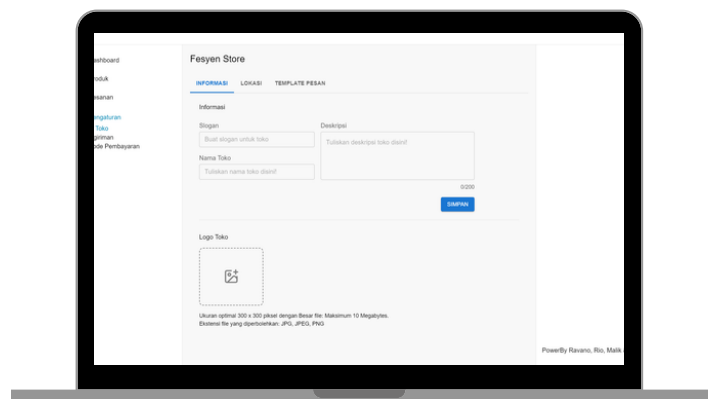

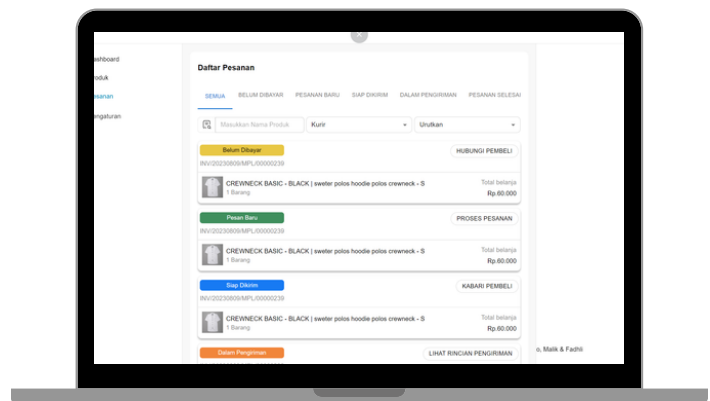

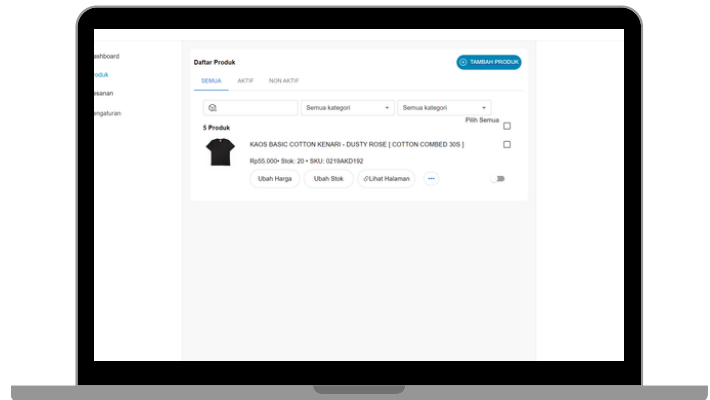

Source Code

Front End

Back End

PORTFOLIO

PROJECT 3

MOODS APPS

Objective

Mood Tracker app is a simple and intuitive solution that allows users to log their mood every day. With this app, users can better understand their emotions and identify mood patterns that occur over time

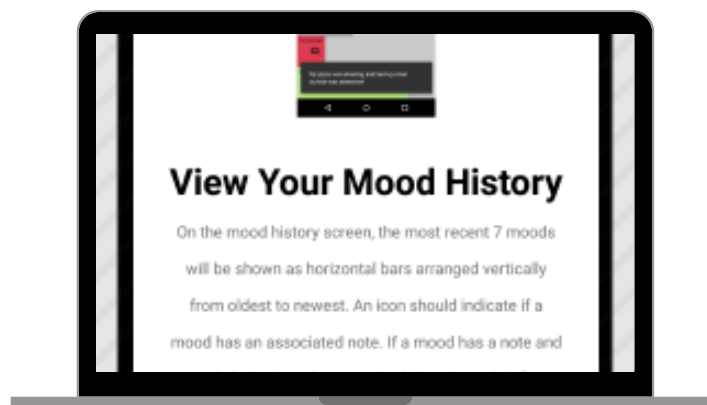

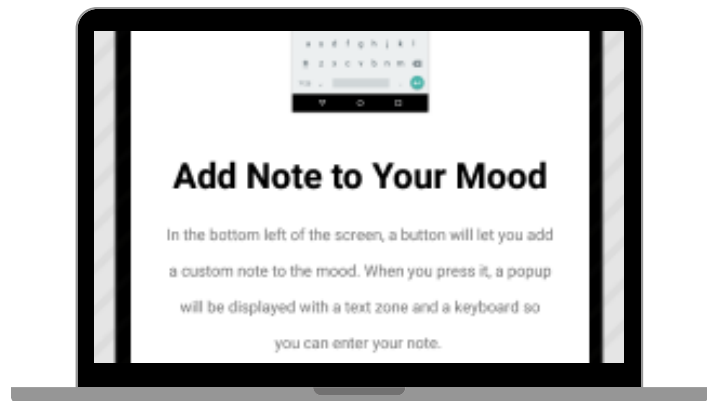

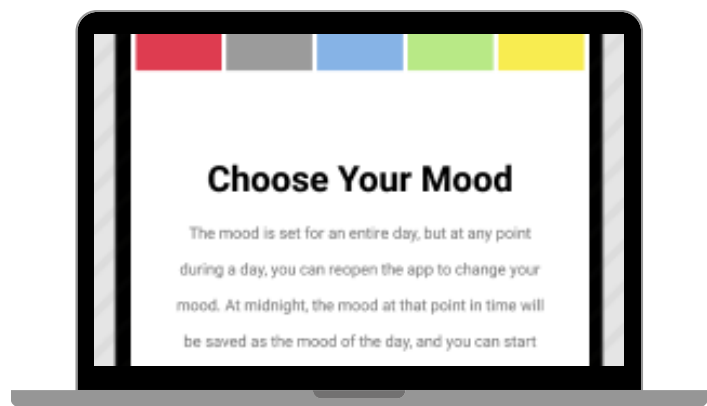

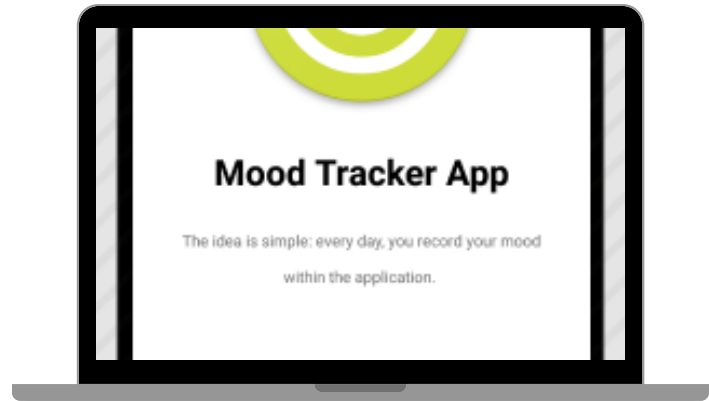

Tech Stack

- **HTML**
- **Android Development**
- **Java**

Source Code

Full Code

PORTFOLIO

PROJECT 3

SALES SYSTEM

Objective

Developed a comprehensive web-based Sales Management System using React.js, TanStack Query, and Chakra UI, designed to streamline and automate core business operations including customer, product, and transaction management. Implemented modular and maintainable components to ensure scalability, while leveraging TanStack Query for optimized data fetching and real-time synchronization with backend APIs. Focused on delivering a highly responsive, intuitive, and efficient user interface that enhances usability and workflow productivity. Built with clean, well-documented, and bug-free code, the system integrates seamlessly with backend services, ensuring smooth data flow and reliable performance across devices.

Tech Stack

- React.js
- Node.js
- Chakra-UI
- Javascript
- Prisma
- Typescript
- MySQL
